Useful commands  
=====
```

`find` CONDITION
Search for files satisfying the condition, starting from your current working directory.

There are many possible conditions. They can constrain the file names, size, modification date, etc. For example `-name "PATTERN"` `-iname "PATTERN"` are both related to file names.

`man` COMMAND
Display the manual of the command.

Important key bindings:

<code>q</code>	quit
<code>Space</code>	scroll down one page
<code>/ STRING</code>	search for the string
<code>n</code>	find the next occurrence of the search string

Remark

The description of the `find` command is deliberately kept short. You will find more information in the manual. (You can for example search for the string `-name` in the manual.)
